

Center for Health Economics of Treatment Interventions for
Substance Use Disorder, HCV, and HIV

Now Hiring a Postdoctoral/Staff Position

Located at the University of Miami Miller School of Medicine

Kathryn McCollister, PhD, Interim Chair and Professor in the Department of Public Health Sciences at the University of Miami Miller School of Medicine is seeking to hire a PhD-trained (or Masters' with experience) candidate to work on health economics projects - including costing & cost-effectiveness –of interventions targeting substance use, HCV, HIV, and other comorbid conditions.

The candidate may be seeking research staff or postdoctoral role. Ideal candidate can commit to an in-person or hybrid setup, although remote work may be considered.

Please reach out to kmccolli@miami.edu.

About CHERISH

The Center for Health Economics of Treatment Interventions for Substance Use Disorders, HCV, and HIV (CHERISH) is a multi-institutional Center of Excellence funded by the National Institute on Drug Abuse (NIDA). The Center's mission is to develop and disseminate health economic research on healthcare utilization, health outcomes, and health-related behaviors that informs substance use disorder treatment policy and HCV and HIV care of people who use substances. The Center is a collaboration among Weill Cornell Medicine, Boston Medical Center, Boston University School of Public Health, University of Pennsylvania, and University of Miami Miller School of Medicine.
